

ALOK PRATIHAST

.NET Developer | ASP.NET Core | C# | Entity Framework Core | SQL Server | Angular | REST APIs
+91 9691292527 | alokpratihast05@gmail.com | [linkedin.com/in/alok-pratihast-51a099223](https://www.linkedin.com/in/alok-pratihast-51a099223) | github.com/Alokpratihast

PROFESSIONAL SUMMARY

.NET Developer with 1.5+ years of professional experience (plus 2 years of hands-on project work during M.Tech) designing and building production-grade backend systems and APIs. Built a Portfolio Management System on ASP.NET Core Web API with JWT authentication, Repository Pattern, Service Layer, AutoMapper, and FluentValidation, backed by Entity Framework Core and PostgreSQL. Delivered a recruitment & CMS platform powering 50+ REST API routes and a live service-marketplace backend processing Rs. 1 lakh+ in transactions for 50,000+ users, applying the same clean-architecture principles - layered services, DTO mapping, validation pipelines, and JWT-secured auth - across .NET and Node.js stacks. Comfortable owning the backend end-to-end - data modeling, API design, auth, and deployment - from requirements through production. Currently targeting .NET Developer / Backend Developer roles.

TECHNICAL SKILLS

Frontend: Angular, TypeScript, Next.js, React, Tailwind CSS, Vue 2, Bootstrap, jQuery, Framer Motion, Radix UI
Backend: ASP.NET Core Web API, C#, Entity Framework Core, Repository Pattern, Service Layer, AutoMapper, FluentValidation, SQL Server, PostgreSQL, REST APIs, Node.js (Next.js API Routes), MongoDB, MySQL
Auth & Payments: NextAuth, JWT, OAuth 2.0, Razorpay, Stripe
AI/Backend: FastAPI, SQLAlchemy, PostgreSQL, Redux, LangGraph, Groq LLM (agentic tool-calling)
DevOps/Cloud: AWS EC2, Docker, Blue-Green Deployment, Node.js, Redis, Nginx, CI/CD basics
Core CS: Data Structures & Algorithms, OOP, SOLID Principles, Design Patterns (Repository, Service Layer, Singleton), Database Design/Normalization
Tools: Git/GitHub, Redis, Socket.IO, ImageKit, Puppeteer, jsPDF

EXPERIENCE

Full-Stack Developer - ATX Technologies Jan 8, 2025 - Jun 15, 2026

- Owned the recruitment platform end-to-end - designed and built the job portal, admin operations dashboard, and SEO-friendly blog/CMS from requirements to production, now used daily by the internal ops team to manage job postings and applications.
- Built multi-role authentication and 50+ production API routes (jobseeker/employer/admin/superadmin) powering job posting, applications, and shortlisting - cutting manual applicant screening effort for the ops team.
- Automated offer-letter and invoice generation, replacing a manual document process and cutting turnaround from hours to seconds for the admin team.
- Independently designed every page - job listings, application flow, and admin panels - and owned the database models and dashboard UI in a collaborative Git/GitHub workflow.
- Independently provisioned and maintained the production server on AWS EC2 with a blue-green release workflow, delivering zero-downtime updates for a live production system.

KEY PROJECTS

Portfolio Management System Next.js | Angular | ASP.NET Core | PostgreSQL
Full-stack portfolio site with a secure admin dashboard for content management
Live: fullstackportfolio-mocha.vercel.app | github.com/Alokpratihast/Fullstackportfolio

- Designed and built a full-stack portfolio platform with a public Next.js website and a secure Angular admin dashboard for managing all site content.
- Built scalable REST APIs using ASP.NET Core Web API with JWT authentication, Repository Pattern, Service Layer, AutoMapper, and FluentValidation for clean, maintainable architecture.
- Implemented full CRUD functionality across six content modules (Projects, Skills, Experience, Education, Certificates, Social Links), enabling code-free content updates through the admin panel.
- Deployed a production-ready, cloud-hosted solution using Vercel (frontend & admin), Render (backend API), and Neon PostgreSQL (database).

ATX Technologies Platform Next.js | TypeScript | MongoDB | NextAuth
Recruitment portal + admin operations dashboard + CMS
github.com/Atxtechnologies/ATX_technologies | Live: atxtechnologies.in

- Designed and built a complete job portal where employers post job openings, candidates apply directly, and admins track application status and shortlist candidates - covering the entire hiring workflow end-to-end for jobseeker, employer, and admin roles, cutting manual screening effort for the ops team.

- **Built an SEO-friendly blog & CMS module** for publishing company content and job listings, structured for SEO (meta tags, clean URLs, semantic markup); underlying data (jobs, applications, invoices, blog content) organized for fast dashboard performance at scale.
- **Designed the full admin operations dashboard** - job postings, applicant tracking, shortlisting, and automated offer-letter/invoice generation (downloadable PDFs) - cutting document turnaround from a manual multi-step process to seconds, with fast search and smooth performance for daily internal use.
- **Designed and built every page end-to-end** - job listings, application flow, and employer/admin panels - and independently set up and managed the AWS EC2 hosting for the live platform, from server provisioning to deployment.

Nayku - Multi-Service Booking Marketplace

Laravel | PHP | MySQL | Razorpay/Stripe

Live web + mobile app (nayku.com) - 2,400+ verified experts, 50K+ users, iOS & Android

Live: nayku.com | github.com/code-nayku/PHP-laravel-Website-admin

- **Built a booking engine** with time-slot locking, double-booking prevention, and UTC-safe rescheduling across a 57-model, 86-migration Laravel codebase, supporting 2,400+ providers with zero reported double-bookings post-launch.
- **Integrated Razorpay and Stripe end-to-end** - order creation, signature verification, and DB-transaction-safe booking finalization with row locking - independently owned the payments pipeline end-to-end, processing Rs. 1 lakh+ in live sales for a 50K+ user base.
- **Shipped real-time chat/video consultations** (Socket.IO/Redis) and the full admin panel (333 Blade views) with SEO-friendly landing pages, supporting the app's live App Store & Play Store launch.
- **Provisioned and managed the production server** on AWS EC2; set up a blue-green deployment workflow across staging → production with Redis caching, enabling zero-downtime releases for a live, revenue-generating platform.

AI-CRM for Healthcare Professional (HCP) Interactions

React | Redux | FastAPI | SQLAlchemy | LangGraph | Groq LLM

AI-first CRM module - structured logging + conversational assistant

github.com/Alokpratihast/ai-crm-hcp

- **Built a LangGraph agent** backed by a Groq-hosted LLM with 7 production CRM tools - log, edit, search, history, follow-up suggestion, summarization, and material recommendation - automating tasks previously done manually by sales reps.
- **Developed AI Autofill** that parses pasted voice-call transcripts into structured interaction fields, cutting manual data entry time for reps on every logged interaction.
- **Built the full stack end-to-end** - React/Redux frontend and FastAPI/SQLAlchemy/PostgreSQL backend, including the tool-calling API layer connecting the agent to the CRM database.

RESEARCH

An Enhanced EfficientNetB0 Framework for Pneumonia Detection from Chest X-ray Imagery

IEEE Conference Paper (submitted, under review) - co-authored with Dr. Bhupesh Gour, LNCTS Bhopal

- **Designed and trained** a transfer-learning deep learning model (EfficientNetB0 + batch normalization, L1/L2-regularized dense layers, dropout) for automated pneumonia detection from chest X-ray images.
- **Achieved 96.80% test accuracy** and a 0.97 weighted F1-score, benchmarking the model against 6+ prior published approaches (VGG16, ResNet50, ShuffleNet, ABO-CNN) as part of a comparative literature review.

EDUCATION

Master of Technology (M.Tech) - LNCT, Bhopal

2023 - 2025

- Built and shipped the ATX Technologies and Nayku platforms as hands-on project work during this period, applying coursework directly to production-grade full-stack systems.

Bachelor of Technology (B.Tech) - LNCTU, Bhopal

2019 - 2023
